

PUNTALI E PIPETTE

TIPS AND PIPETTES

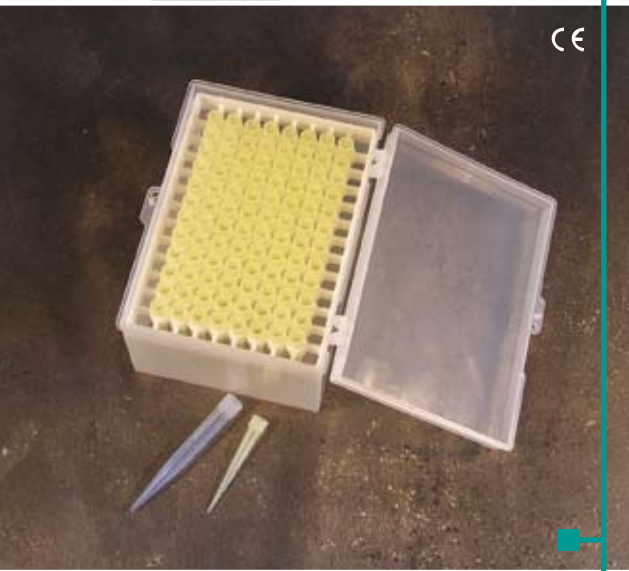

PUNTALE PER MICROPIPETTE TIPO EPPENDORF®
TIPS FOR MICROPIPETTES EPPENDORF® TYPE

Disponibili in confezioni sterili da 5 pezzi, in rack da 96 pezzi con coperchio (sterili e non) e in piastrelle intercambiabili da 96 pezzi.

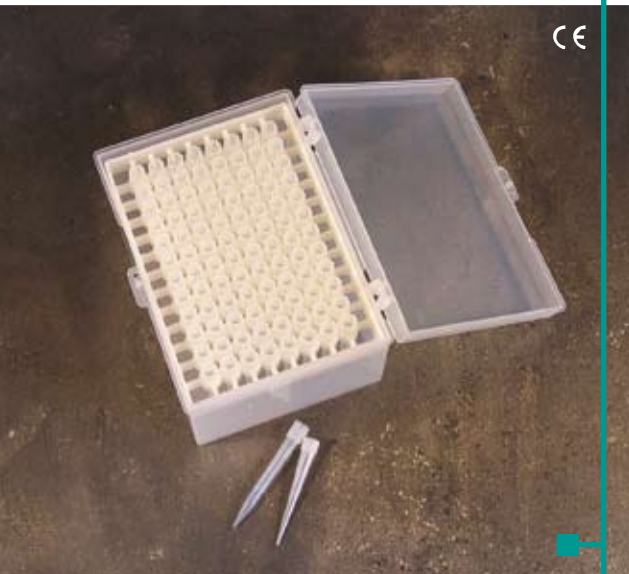

Materiale: polipropilene.
Autoclavabili.

Available in sterile bags of 5 pieces, in rack with lid of 96 pieces (sterile and non sterile) and in refill trays of 96 pieces.

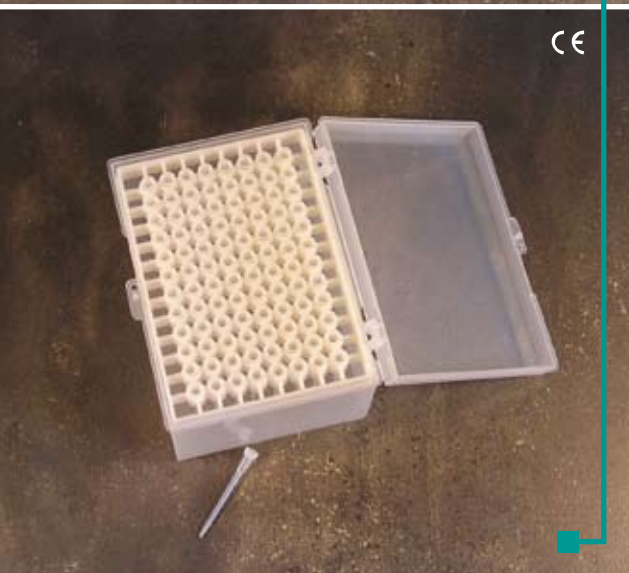

Material: polypropylene.
Autoclavable.

PUNTALI
TIPS

PUNTALI CON FILTRO STERILI
STERILE FILTER TIPS

I puntali con filtro sono realizzati per eliminare il rischio di contaminazione e di risultati alterati, causato da micropipette contaminate. Sterilizzati con irraggiamento Gamma sono totalmente esenti da DNA, RNA, Cadmio e sono Apirogeni. Ideali per impieghi in biologia molecolare, colture cellulari, batteriologia, virologia, immunologia e radio-immunologia. Sono confezionati in rack con coperchio da 96 pezzi, singolarmente sigillati con film trasparente per garantirne la sterilità. Materiale: polipropilene. Autoclavabili.

Filter tips have been manufactured in order to eliminate the risk of contamination and forged results, caused by contaminated micropipettes. Sterilized by Gamma rays irradiation, they are DNA, RNA, cadmium and Pyrogen free. Suitable for use in molecular biology, cells culture, bacteriology, virology, immunology and radioimmunity. Supplied in rack with lid of 96 pieces, individually sealed by transparent film to grant its sterility. Material: polypropylene. Autoclavable.
